

## Important Information on Bike Course for Morgans Little Miami Triathlon from Gary Morgan

After meeting today and yesterday on the bike course with the timers, Don Connolly, Warren County Sheriff Deputies and myself to discuss different options for the bike course, we have found a solution to keep the full triathlon bike course similar to the original segment by doing a double loop.

Persons doing the entire tri (not ½ tri) will do a double loop by going right on Middleboro Road on the way back on Route 350 from their first loop. There will be new signage directing you. Participants doing the double loop (ie Full Triathlon participants) will need to be scanned twice by our new timing crew/tent which will be installed on the new route. The half tri people will be scanned only once by the additional timing crew on the course.

It will be extremely important for all participants to make sure their number is CLEARLY VISIBLE on the front of their shirts. You will be required to slow down when approaching the timers so you can be properly scanned. With your cooperation with the new additional scanning station, we will be able to keep the course close in length to the original full triathlon course. Our calculations measure the distance to be increased by one mile over the original route.

Thank you for your patience as we have worked through the logistics at this little wrench thrown into the program. The Morgan Family wishes you the best of luck in the Triathlon and look forward to seeing you all soon!

*P.S. Please DISREGARD the note regarding the Bike Course in the packet that was sent out with your race number as this is updated information.*
